

AIRCRAFT AND MISSILES IN MUSEUMS AND ON DISPLAY IN THE U.S. AND CANADA

By STEPHEN MUTH

The following listing of aircraft and missiles is primarily based on correspondence with the agencies listed or has been verified by an individual. The listing is unavoidably incomplete in some respects and out of date in others, such as Tallmantz Aviation which has sold many of its planes in 1966. However, all known facts have been included, and an effort has been made to date all data, excepting single plane displays.

Many museums change their displays rather frequently, so anyone contemplating a trip to see a particular display would be best advised to check beforehand by letter or telephone with the agency involved.

A word or two on accuracy--obtaining correct serial numbers for many of the U. S. Air Force planes has been a real problem. Many of the numbers were suspect, for one reason or another, but they have been recorded just as received, for doing otherwise, might add errors and there are probably enough unavoidable ones already. The philosophy of compilation has been "better incomplete than incorrect." Any additions or corrections (be positive, please) will be welcomed by the author. (Address is 39-02 214 Pl, Bayside, N.Y. 11361--Ed Note.) It is hoped that when all additions and corrections have been received this listing can be republished as a separate publication for the A.A.H.S.

All aircraft and missiles are listed herein under the name of the agency in charge of them, with its address and the name of the officer in charge. Listings are in three columns: Left, name and designation of the aircraft or missile; Center a code letter to show its condition; and Right, pertinent data. Code letters to show condition are: D - Display, F - Flyable, S - Storage, IP - In Process of repair or restoration. Where (r) follows the name of an aircraft, it indicates that machine is not an original but a reproduction.

Following the listing of agencies there is a listing, alphabetical by type name, of Miscellaneous Single Aircraft on display or stored in the U. S. and Canada.

Republic F-84E	D	S/N 49-2348, near San Jose Municipal Airport, San Jose, California, belongs to San Jose State College	AUTHOR'S ACKNOWLEDGMENT: This listing would not have been possible without the help of the many generous people I have corresponded with over the last year. I would like to thank all those individuals and organizations, which are too numerous to list, and give particular thanks to the following: <u>Aviation Week</u>, <u>Air Force Digest</u>, <u>Flying Review International</u>, <u>Air Progress</u>, <u>Model Aviation</u>, <u>American Modeller</u>, and our own A.A.H.S. JOURNAL, Mr. Louis Casey and Mr. Wood of the Smithsonian Institution, Mr. Robert Ludwig and Mr. Irving Rosenberg of the New York Aviation Historical Society, Mr. Paul Stevens, Mr. Bude Donato, Mr. Robert Snyder, Lt Stephen Miller, Mr. Douglas Pirus and last, but not least, my wife who did much of the typing and proof-reading. EDITOR'S NOTE: The listing that appears on this and the preceding sixteen pages is the result of a long and arduous effort by Steve Muth. When it began, the feeling was that the list would run to five hundred or six hundred aircraft, but events were to prove that the true number would be nearly twice that. In a letter to the Editor, Steve recently confided that if he had known of the work that would be involved when he first considered this project, he was unsure now if he would have undertaken it. Frankly, I think that he would have done so, for we both know the results will be a great aid to many. This is felt even with the knowledge that there is work to be done to make this list one hundred percent complete--work that can be accomplished in its entirety only with the help of every Member who can add to or correct material herein. Steve has been interested in aviation as far back as he can remember. He attempted his first model airplane when he was six years old and has been building models ever since. His interests center on World War II aircraft, and he has a very modest collection of three-view drawings, magazines and photos that he has collected over the years. In his own words: "This listing started as a small list of places I could write to for photos and data to support my scale modeling activities. I thought others might be interested in such a list and volunteered to supply it to the Society. Before I realized it, the listing became a big project and grew from several hundred aircraft at the major museums to over a thousand in the United States and Canada alone. I hope to continue the project by listing the aircraft in other countries as the data becomes available."
