- Notes: 1. During the 3rd quarter of fiscal 1954 C-45's began to be delivered to State ANG headquarters to ease the critical shortage of transport aircraft, and to allow them to be used in their primary function. The case of the Michigan T-11 was, however, much earlier than this and is the only such example known to the authors.
2. Reportedly some units are equipped with RF-80C's and F-94C's, but this is unconfirmed. Refer to "Fact Sheet" in references, page 3, distributed to the press. In addition recent magazine reports indicate that PENN ANG will be the first to receive Martin B-57's, but these have not as yet been delivered.
3. The above source lists the ANG as equipped with F-86D's and F-89C's.
