

SEVERSKY PHOTOGRAPHS

Howard Levy, moved by the recent photo page devoted to the civil P-35 (see Volume 3, pages 48-49), has dug into his files and sent us the following interesting items from his collection.

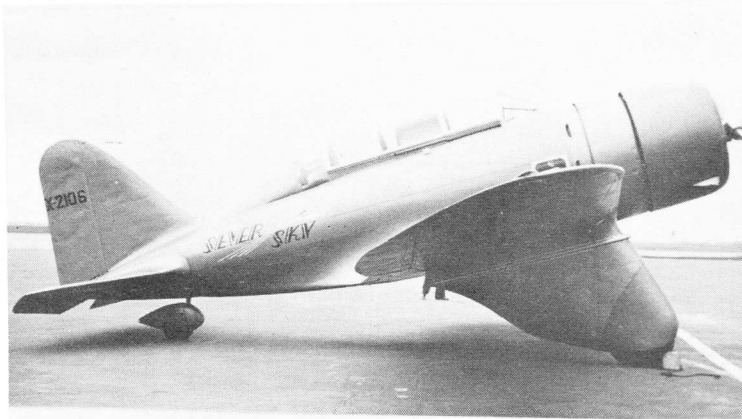

He also comments that the airplane captioned "unknown model" (Fig. 2, page 49) was described to him by Seversky engineers as the model AP-1.

1. Seversky 3XAR. It is believed that Seversky set some records with this plane.
2. BT-8 Army trainer modified with P-35 rudder.
3. 2PA export fighter. Registered R-189M.
4. 2PA-B3 export fighter. Has F-1 on fin.
5. 3M-WW seaplane. Has U.S. civil registration X-15391 on the tail, but the military insignia is for the Colombian Air Force.
6. AP-2. Seversky ground-looped this plane on landing at Floyd Bennett. He was on his way to Cleveland and the National Air Races.
7. AT-12 modified. This is the special Wright Field job with added dorsal fin.
8. EP-1 for the Swedish Air Force.
