

AVIATION PERIODICALS

PUBLISHED IN THE U.S.A.

Compiled by Robert F. Pauley

The following list has been compiled in the interest of aiding Members of the American Aviation Historical Society to become familiar with magazines and other periodicals devoted to aviation. Admittedly not complete, it is hoped that the Members will be able to make additions and/or corrections for future issues of the Journal. An obvious area for further listings would be in the field of foreign aviation magazines such as Air Pictorial (Great Britain) and Aviacion (Mexico).

We have tried to limit the list to publications dealing only with aircraft such as airplanes, balloons, etc. The missiles, rockets and astronautics magazines must be found in other sources. While new magazines are always coming into existence, some are short lived, and others die off, so that keeping this list up to date is difficult. It should be of help to those not familiar with the wide range of aviation periodicals available currently.

AERO/SPACE ENGINEERING

2 East 64th St., New York 21, N.Y.
Monthly \$5.00 per year 8½ x 11½
Formerly AERONAUTICAL ENGINEERING REVIEW. Published by The Institute of The Aeronautical Sciences. Technical articles, mostly about rockets in these times.

WINGSPAN

P.O. Box 867, Elmira, New York.
 Monthly \$3.00 per year 8½ x 11
 Began publication February 1959. Dedicated to non-professional flying.

Research Information Needed

AMERICAN HERITAGE, 551 Fifth Avenue, New York 17, N.Y.

To: American Aviation Historical Society

Gentlemen,

We have begun intensive research for our planned pictorial history of aviation, to be published in 1962, and I wonder if the American Aviation Historical Society could assist us on a few matters.

First, any information you would have about private collections of aviation pictures would be most welcome. We are looking for rare, unique and unpublished photographs and contemporary drawings, paintings, posters, etc. --- particularly material which can be reproduced in color. Our book will span the history of flight from mythology to the present day.

Secondly, I believe that you have been involved in obtaining transcribed interviews with aviation leaders and pioneers. We are planning to include material of this sort in our volume, and if you and the Society would be willing to make available to us such interviews we shall be most grateful.

Finally, I have found the A.A.H.S. JOURNAL one of the best publications of its type I have ever seen and would like to obtain all of the back issues.

Sincerely,
 (s) Stephen Sears, Asst. Editor,
 Book Division.

Well, thank you, Mr. Sears, for the kind words. Members, what is your pleasure?
